165.	bureaucracy	Bureaucracy is the body of unelected government officials who usually pass an examination
166.	engineering	Pyramids are great engineering examples

167.	floods	All major river valley civilizations had floods.
168.	merchants	Merchants and traders are involved with trade
169.	plow	Sumerians invented the plow for agriculture
170.	molecule	Atoms can join with other atoms to make a molecule.
171.	cohesion	The property that holds molecules of a substance together is cohesion.
172.	adhesion	The property that holds molecules of different substances together is adhesion.
173.	evaporation	Evaporation occurs when liquid changes into gas.
174.	condensation	The change of state from a gas to a liquid is called condensation.
175.	precipitation	Precipitation is any form of water that falls to Earth from clouds.
176.	runoff	Streams, rivers, and the water that flows over land are types of runoff.
177.	groundwater	The water found in the spaces between rock particles below Earth's surface is called groundwater.
178.	gradient	Gradient is a measure of the change in elevation over a certain distance.
179.	porosity	The storage space in an aquifer is measured by porosity.
180.	permeability	Permeability is a measure of how easily water can flow through an aquifer.
181.	density	Density is a measure of the mass of a substance divided by its volume.
182.	satellites	Satellites can measure variations in the height of the ocean's surface.
183.	vessels	Scientists use underwater vessels to explore the oceans.
184.	wavelength	The distance between two adjacent wave crests or wave troughs is a wavelength.
185.	landslide	Underwater landslides can displace water and cause waves.
186.	tsunami	A tsunami is a series of waves that form when a large volume of ocean water is suddenly moved up or down.
187.	convection	In the ocean, a convection current is a movement of water that results from density differences.

188.	thermosphere	The thermosphere is the uppermost layer of the atmosphere.
189.	stratosphere	The stratosphere is between the mesosphere and the troposphere.
190.	ozone layer	The ozone layer is an area in the stratosphere where ozone is highly concentrated.
191.	greenhouse	The greenhouse effect is the process by which gases in the atmosphere, such as water vapor and carbon dioxide, absorb and give off infrared radiation.
192.	conduction	Conduction is the transfer of energy from one object to another through direct contact.
193.	Westerlies	The Westerlies blow between 30° and 60° latitudes in both hemispheres.
194.	humidity	The amount of water vapor in the air is called humidity.
195.	weather	Weather is the condition of Earth's atmosphere at a certain time and place.
196.	barometer	A barometer is used to measure air pressure.
197.	lightning	Lightning is an electric discharge that happens between a positively charged area and a negatively charged area.
198.	tornado	A tornado is a destructive, rotating column of air that has very high wind speeds.
